

Software Engineer | 3+ Years

Professional Summary

As a Software Developer, I am a skilled and driven professional with experience in developing and implementing front-end components and features using React js, Nextjs, Angular, Javascript, TypeScript, Responsive web design, HTML, and CSS.

- I have a solid understanding of Reactjs, Next Js and Angular concepts, including modules, components, Redux, SSR, reusable components, content stack api calling using graphql, services, and dependency injection, and I am comfortable working with REST APIs
- Working closely with senior developers, I have contributed to the design and development of scalable and maintainable web applications, while also being responsible for testing and debugging my code, collaborating with team members, and continuously learning and growing my skills.
- I have integrated a contentful portal and big commerce product with an application to make user friendly.
- Automated the application by applying the CI/CD tool using GitHub.
- Experience working with various open-source plug-ins and customizations.
- Experience working with different types of microservices related to the front end.
- Experience working with state management of applications using Redux.

Work Experience

- **Drinnovative** - Software developer (June 2024 - Present), Ahmedabad, Gujarat
- **Tridhya tech Ltd (Coodeit Pvt Ltd)** - Jr. Software Engineer (June 2022 - June 2024), Ahmedabad, Gujarat
- **Teamlease pvt ltd** - Assistant network engineer (June 2019 - June 2022), Bangalore, Karnataka

Technologies / Core Competencies

- **JS Libraries and Frameworks:** Next.js, React.js, Angular (v2–v19)
- **Web Technologies:** HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript, JSON, AJAX, Fetch API
- **Testing Frameworks:** Jasmine, Karma, Jest, React Testing Library
- **Version Control:** Git, GitHub, GitLab, Bitbucket, Azure Repos
- **State Management:** Redux, React Context API, Redux Toolkit
- **UI-Kit:** PrimeNG, Material UI (MUI), Ant Design, Chakra UI, Syncfusion UI, Bootstrap, React Bootstrap, Tailwind CSS
- **CMS:** Contentful
- **Authentication Libraries:** Auth0, JWT (JSON Web Tokens), OAuth 2.0 / OIDC
- **Project Management Tools:** Azure DevOps Boards, Jira, PMS, Confluence
- **CI/CD & DevOps:** GitHub Actions, GitLab CI/CD, Azure DevOps Pipelines

Industry Domains

- Healthcare & Insurance Systems
- Pharma & Healthcare Retail
- No-Code / Low-Code Platforms
- Standards & Certification
- Government & Public Services
- Telecom & Digital Services

Projects

Project	Responsibilities & Description
Circles	- Contributed to the development of a fully digital telecom platform focused on mobile plans and customer services. - Created reusable and responsive UI components using Tailwind CSS and Ant Design, improving site performance and maintainability. - Integrated customer self-service features and optimized user flows to support personalized and flexible digital mobile experiences. Stack: React, Tailwind CSS, Ant Design Project Description: fully digital telecom platform, focusing on a seamless and user-friendly interface.
ASTM International	- Built high-performance web pages using Next.js with Server-Side Rendering (SSR) and Static Site Generation (SSG). - Integrated Content Stack APIs using GraphQL and custom parsers like HTMLReactParser for dynamic content rendering. - Focused on creating responsive user interfaces with optimized performance. - Maintained code quality through SonarCloud analysis and applied best practices. - Developed modular, reusable components to enhance maintainability. - Ensured code reliability and functionality with rigorous testing using Jest. Stack: Next-Js, Typescript, BootStrap, GraphQL, SonarCloud Project Description: ASTM International develops and delivers voluntary consensus standards, certification programs, and training to improve product quality, safety, and industry compliance worldwide.
Aberdeen City Council	- Contributed to the development and enhancement of the Aberdeen City Council website. - Improved user accessibility and integrated digital services to support community engagement. - Implemented features such as multilingual support and an AI-powered chatbot for enhanced user interaction. Stack: Angular, Tailwind CSS, Responsive Design
Maruti (ICP, Arena, Nexa Platforms)	- Managed the entire login process using Azure AD B2C for secure authentication. - Customized chatbot interfaces and interactions using HTML, CSS, and JavaScript to enhance customer support. Stack: Azure AD B2C, HTML, CSS, JavaScript
Kaktus	- Identify class components in your project and rewrite them as functional components. - Extract logic into custom hooks or utility functions for reuse across components. - Ensure that UI components are designed with responsiveness in mind using CSS frameworks like Bootstrap. - Bind data fetched from APIs or stored in state to UI elements using JSX syntax. Stack: React-JS, Axios, Redux, Typescript, SCSS, JSX, MIUI. Project Description: The US-based pharmacy project aims to enhance customer convenience by integrating with a kiosk machine for medication ordering and pickup
Tableflow	Designed Angular components and higher-order components.

Project	Responsibilities & Description
	- Developed web applications using Angular, Typescript, and syncfusion UI. - Fixed Azure tickets raised by the QA team and improved application stability. - Implemented reusable services, directives, and utility functions to streamline development. - Improved UI/UX by creating responsive and accessible layouts using SCSS. - Collaborated with backend and QA teams to ensure smooth feature delivery. Stack: Angular, Typescript, SCSS, Syncfusion UI. Project Description: User-friendly interface empowers you to design your application's user interface and functionality effortlessly.Plus, our advanced features ensure a seamlessly running application.
Benefit Calculator	- Developed dynamic Angular components to calculate insurance benefits based on multiple parameters. - Implemented forms with reactive validation for age, gender, spouse information, state selection, and plan amount. - Integrated REST APIs to fetch company-wise insurance products and premium details. - Enhanced UI/UX using PrimeNG components and custom SCSS for better responsiveness. - Built reusable services for business logic, data processing, and API communication. - Collaborated with QA to fix reported issues and ensure calculation precision. Stack: Angular, Typescript, SCSS, PrimrNg UI. Project Description: Benefit Calculator is Calculate insurance of different products of different companies. It's Calculate based on gender, age, Spouse's age, states, amount, and deferral period. Using Benefit Calculator easily select insurance product of any companies of any state and buy that.

Educational Qualifications

B.E.E.C	Government Engineering college - Bhuj in 2017 with 7.8 CGPA.
D.E.E.C	Christ pollytechnic Institute - Rajkot Passed in 2014 with 8.15 CGPA.
S.S.C	Secondary School Certificate Examination with 68%.

Trainings

- Frontend Developer Training - Career Infoway Rajkot(6 months)

Personal Details

- Date of Birth:** 26/08/1995
- Languages Known:** English, Gujarati, Hindi
- Hobbies:** Traveling, Listening to Music, Play Cricket
